

PRODUCT DATASHEET

Edge Scout mini

The entry-level sensor. Tethered to a phone or tablet over USB-C, no battery to charge and cheap enough to give to everyone on the team.

\$129

Limited stock · US shipping

At a glance

- Detects Bluetooth and Wi-Fi Remote ID broadcast
- Edge Scout ATAK plugin compatible
- Edge View compatible
- No configuration — plug in and it works

HOW TO BUY

List pricing is published, so a grant or contracting officer can establish price reasonableness without a quote cycle. This sensor sits below the federal micro-purchase threshold of \$15,000 — a card purchase rather than a procurement action.

Quotes, W-9 and signed vendor certifications on request.

SPECIFICATIONS

Frequency bands	2.4 GHz
Power	USB-C tether (no battery)
Connectivity	USB-C · Bluetooth
Assembly	New Hartford, New York, USA

Detects. Aircraft broadcasting FAA-mandated Remote ID over Bluetooth or Wi-Fi — position, identity, track, altitude, speed, and the operator's location where the broadcast includes it.

Does not detect. Aircraft with Remote ID disabled or absent, hand-built or FPV aircraft, or sub-250 g recreational aircraft not required to broadcast.

WORKS WITH

Edge Scout ATAK plugin — detections appear as markers in ATAK, on the screen your team already uses. Requires ATAK-CIV 5.5 or later.

Edge View — the whole fleet on one map, with geofencing, SMS and email alerting, and automated breach reports exported as PDF with a KML track. The free tier needs no sensor, so it can be evaluated before purchase.

"A game-changer for our department, with its ability to pinpoint the location of drones — and more importantly, their pilots — operating within our emergency response areas."

Mike Leckliter · Firefighter / Paramedic, Corona Fire Department, CA

PROCUREMENT & COMPLIANCE

DHS AEL 030E-07-SUAD — System, UAS Detection and Tracking · **UEI E6S8NUG2D9F3** · **CAGE 8B9J6** · **NAICS 334511** · **PSC 6350** · Small business, US-owned · Government purchase card accepted

Section 889 / 2 CFR 200.216. No covered telecommunications or video surveillance equipment as defined at FAR 52.204-25; reasonable inquiry conducted. Purchasable with federal grant funds. **American Security Drone Act.** A ground-based receive-only radio device is not an unmanned aircraft system under 49 U.S.C. 44801(12); ASDA §§1823-1826 do not apply. **FCC.** Part 15 authorized; external antenna connectors are receive-only. Signed vendor certification supplied with every quote.
